## Company Profile

### Our Services

In an era of competitive tendering and constant review of service standards and costs, it may seem surprising that many of our service customers have been with us for many years. In fact, some of our clients, such as the NRMA have stuck with Hartex Engineering Service for a remarkable 15 years! Why? We feel the best explanation lies in the kind comments of our clients;

“ They never let us down, Hartex are sensational. ”

CHRIS McCANN - NRMA INSPECTION STATION, LIVERPOOL

“ I honestly can't think of one instance where they've ever let us down... They get it right first time, every time. ”

PETER PARKES - RTA, NSW - PENRITH\*

Add to this the extensive facilities and wide expertise that Hartex can put at our customers disposal, and choosing Hartex to maintain your equipment is the natural choice. We can provide programmed and event based maintenance for everything from brake tester to hydraulic lifts. Please feel free to contact us regarding a service agreement.

### Company History

Engineering Pty Ltd has been building and installing vehicle workshop facilities for over 25 years.

Our workshops can include, lubrication systems, washing equipment, Jacking systems, Brake Testers and more.

Our after sales service has been recognised as second to none to the heavy transport clientele in Australia & New Zealand.

HARTEX has accumulated a wealth of technical expertise in delivering world-class vehicle workshops on time and on budget.

Our broad manufacturing capabilities are supported by a range of associated equipment imported from the best European, American & local sources.

Contact us today on 1300 881 383 to find out how we can assist you with your latest project.

- Mobile Wheel Lifters, Jacking systems for pits
- Roller brake testers
- Steering and Suspension Play Detectors
- Compressed air reticulation.

## Company Profile

Workshop Pits

Our Workshop Pits are ideal for truck operators with large fleets of B-Doubles or prime movers. We offer numerous types of pits, including Suspended Ceiling Pits, Fully Fabricated Pits, Kerb Angle Pits, Pit Lighting & Ventilation and general Pit upgrades.

Heavy Vehicle Washing Equipment

Our Heavy Vehicle Washing Equipment range includes the latest technology making them some of the fastest truck and bus washing machines available today. These include; Rollover wash, Drive Thru Wash, Single Brush Systems & an Under Chassis Wash.

Wheel Washing Systems

Perfect for rugged conditions in the field, our Wheel Washing Systems ensure that all Heavy Vehicles comply with the necessary council requirements. Our range includes a 2 & 4 Wheel Rollover Wash, Wash Bridges & a Grating Wash system.

Water Recycling Systems

A Water Recycling System is an ideal solution for heavy washing volume washbays. We offer manual or automatic control and portable systems for workshops. An automatic control system is the most efficient way of recycling water.

Diagnostic Equipment

All of our Workshop Pits come with built-in Diagnostic Equipment options. Options include; Suspension Testers, Gas Analysers, and Roller Brake Testers. We also offer accessories such as LCD displays & reporting systems.

Heavy Vehicle Hoists

Hartex can provide a wide variety of Hoists to suit any workshop facility. In particular we supply Column Hoists, Scissor Lifts, 2 & 4 Post Hoists, Forklifts & Container Lifts. We also have numerous accessories to compliment the range.

Jacking Systems

Hartex provide customised Jacking Systems, and also general Jacking Beams and Hydraulic Pit Lifters. Jacking Systems can be custom installed within one of our workshops or supplied separately.

Lubrication Systems

Move large amounts of Oil and Grease with our Lubrication Systems and pumps. Our systems come with full measuring capabilities for reporting purposes and stock control.
